RHODODENDRONS and HARDY AZALEAS
 1960-1961

RHODODENDRONS AT MOUNT HOOD, OREGON

Photographs by Irving B. Lincoln

You Are Welcome to **Scenic LINDUM GARDENS**

For the past several years I have been collecting from Europe and Canada and the United States, the World's finest varieties of Rhododendrons and Hardy Azaleas. Over 350 varieties are now growing on my hillsides in one of the Nation's largest and finest collections displayed in a most scenic setting.

Imported from the gardens of Europe and grown here in fine soil, or propagated here, these choice varieties of Rhododendrons and Azaleas are now available to you in our Nursery to add to the splendor of your garden.

PICK OUT YOUR OWN PLANTS

You are welcome at any time to see this display and to pick out your own plants in the Nursery from a stock of over 35,000 plants. Both the imported plants and those propagated here from fine stock have been grown in very fine soil and have a well established root system. The plants are of the finest quality.

PLANTING NOTES

Rhododendrons will grow in any soil that does not contain lime, is porous, well drained, and fairly rich in humus. They have a close, fibrous root system and if well watered, can be transplanted almost any time, but the best seasons are from September to June, preferably in the Fall and Spring. Plant them not more than an inch deeper than they were planted in the Nursery, in a mixture of Peat Moss or other humus and good top soil, preferably half and half, mixed in a hole 3 feet in diameter by 20 inches deep. If the soil is clay or very poor, remove the soil to a depth of 18", put in good leaf mold, top soil, humus and peat. Cut out tree roots. Avoid heavy muck or loam without air in the soil. Use good soil and little fertilizer. After planting, mulch with leaves, leaf mold, or well rotted cow manure. They will not grow in alkaline soil. A little fertilizer in the Spring when the new growth starts, is advisable to most varieties. Remove seed pods as soon as blooms have faded.

DESCRIPTIONS, GRADES, AND PRICES

It is difficult to describe the size, shape and quality of all plants in a general list. A slow growing, compact, spreading plant, like Britannia or Unique is worth more in a 15-18" plant, than a tall rangy growing plant like Beauty of Littleworth, Pink Pearl, Antoon Van Welie or Sappho. Therefore, in placing a price on a plant, consideration will be given to its comparative size value.

This catalogue supersedes all previous quotations.

VARIETIES

I am endeavoring to have the finest possible list of hardy reliable Rhododendrons and Azaleas for general planting. I have not listed this year some varieties that I do not consider up to standard for general use nor some with little demand. A few new ones have been added.

PORTLAND HARDINESS RATING

After the cold winter of 1949-50 when the temperature here dropped for a long period from -5° to -16° in most nurseries, the American Rhododendron Society sent a questionnaire to its members to determine the damage caused by the cold and the degrees of coldness different varieties would stand. From the results many varieties were rated. These were rated as given below (H-2) based on the minimum temperatures which the variety given may be expected to stand with no injury to leaf, stem or bud. Where the variety is rated it is given after the English rating. These ratings are as follows:

H-1—Varieties hardy to -25° F

These varieties should be hardy in southern New York, southern New England and Cleveland.

H-2—Hardy to -15° F

H-3—Hardy to -5° F

These varieties should be fairly hard on Long Island, Cincinnati, Washington and around Philadelphia.

H-4—Hardy to 5° F

H-5—Hardy to 15° F

These varieties should be hardy during most winters in the Portland and Seattle areas.

AZALEA HARDINESS

The Azaleas listed are much more hardy than most of the Rhododendrons. The Ghents and most of the others will stand the winters of Mid-West and Lake States. The Malvatica Evergreens have been grown in Ohio, Illinois and Michigan. To stand the dry summers of the Inland States they need part shade.

Enclosed is check for \$441.90 for spring Rhododendron order. My other Rhododendrons, which I received from you, have all done extremely well—it is always a pleasure to get your plants. So well packed and looking so healthy.

Mrs. F. C. Frassinelli
Connecticut

I am so pleased with the Rhododendrons and Azaleas ordered last fall that I am placing another order for two more Rhododendrons.

Miss Dorothy Maraman
Kentucky

The three Rhododendrons arrived in perfect condition. We like the way you crated them with plenty of air circulation, they looked as fresh as when they left.

SIZES

Sizes of plants change every year, but I do not get out a catalogue only about every three years. I try and have all sizes, but they may vary from year to year. If a plant is below standard for that variety, it will be graded and priced one size smaller. But extra bushy plants will be graded to larger sizes as follows:

EXTRA BUSHY PLANTS

Extra bushy plants will be priced the same as a higher size and more than extra bushy plants, will be the same as two sizes higher. In general large size plants over 18" will be priced according to their shape, bushiness and real value and not just their height.

SYMBOLS

First Class Certificates (FCC); Awards of Merit (AM); Hardiness ratings (B) and Stars * were given by the Royal Horticultural Society of England. Stars in parenthesis (***) my rating. Blooming seasons as a rule are from March to June and plants are marked (VE) very early; (E) early; (ME) medium early; (M) mid-season; (ML) medium late; (L) late; and (VL) very late. Most varieties will stand full sun if kept watered, but prefer part shade. Some varieties require part shade with plenty of daylight and in dry, hot areas of the East and Mid-West, part shade is essential.

Where the variety is not too new to be rated, the stars (*) indicate the quality rating given in England. Our opinion may be different.

The range in the hardiness of the Rhododendrons (English rating) is marked (AA), (A), (B), (C), (D) and (E). (AA) "Iron Clads" for northern United States. (A) will stand full exposure to sun and cold. (B) Medium hardy. (C) is hardy West of the Cascades and should have partial shade in most cases. (D) and (E) are tender.

Growers in Long Island, New Jersey, Delaware, Maryland, Virginia and Kentucky report that plants rated (A) and (B) should succeed there in part shade. (AA) are the "Iron Clads" for the colder parts of the East, Mid-West and Northern States.

GOLDFORT — Clear Lemon Yellow

Most of the plants I ordered last spring and fall are doing beautifully and are well budded for spring bloom. The plants last year were lovely—so nice and bushy and I am looking forward to more of them this year. It is so gratifying to be able to get large plants that made a good show without years of waiting. My order of February arrived in excellent condition despite a week en route and, as usual, the plants were very nice. I am sending another order—\$75.00.

Mrs. Felix Porter
Oklahoma

Six weeks ago my eighteen Azaleas and one Rhododendron arrived in perfect condition. Planting was done according to your requirements and now the plants are ablaze with gorgeous blooms. Every plant seems at home in their new location. Thank you very much for beautifying my garden with these lovely colors. I have already picked out more plants and will order this fall.

Mrs. Earl Wible
California

The Rhododendrons I ordered from you—General D. Eisenhower, Mrs. Charles S. Sargent and Koster's Cream started blooming about the 5th of May and it looks now as if we will have a full month of bloom. They couldn't be prettier.

Two years ago I ordered several Rhododendron and Azalea plants from you and they arrived in excellent condition, even though they had to come so far. They have all done well in my garden, in spite of the thermometer reaching 30 degrees below zero several times during the first winter! Since our winters here are apt to be so severe, I can only plant very, very hardy types.

The Britannia Rhododendron I received from you the first of October was a fine plant. It came in good condition—not a leaf was broken on it. The way you pack them keeps the express charges down.

PEMAKOENSE — Dwarf Pink

The World's Finest AZALEAS

Many garden lovers class these Azaleas at the very top in brilliance, range of color, and beauty of flower. In the months of April and May, they are a mass of strong colors—red, orange, yellow, gold, white, copper, bronze, pink, crimson, mauve, and variegated. We have fifty of the finest varieties blooming for six to eight weeks. First the Molles, then the Occidentales and then the Ghents and Knap Hills with the Occidentales still in flower. They like sun with plenty of moisture, but in the Mid-West where the air is dry and the sun burning, they prefer part shade. They like the same soil as Rhododendrons, but will stand more exposure. Plant at the same depth as they were at the Nursery. It is preferable to remove the seed pods after blooming. All large plants budded ready for Spring bloom.

HARDY GHENT HYBRIDS

Hybridizing of Azaleas started in Ghent, Belgium, in 1825. Since then they have been crossed and re-crossed many times to form our present varieties. These Pontica Hybrids or hardy Ghent Azaleas have a wide variety of strong colors, true and variegated. They are red, orange, yellow, light yellow, bronze, white, pink, crimson, mauve, purplish red and mixtures of colors. Their individual honey-suckle shaped flowers are smaller than the Molles and they are later to bloom than the Mollis or Occidentalis Hybrids. Good bloomers. They are hardy enough for the northern part of the United States. All budded ready for Spring bloom. Noted for their lasting qualities.

- * **BOUQUET DE FLORE.** Bright pink, pale pink and white stripes. Very beautiful. Very late. 12-15 in. \$4.00; 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50.
- *** **COCCINEA SPECIOSA.** This is a lower, more branching and broader plant than Unique and blooms later. In fact, it is one of the latest to bloom. Its color is not as sharp and strong as Unique and a little darker in shade. It has orange and red and yellow markings with orange predominating. 9-12 in. \$3.00; 12-15 in. \$4.00; 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$10.00.
- ** **DAVIESII** (M). Creamy white, pale yellow eye, very hardy. Fine for woodland planting. 15-18 in. \$5.00; 18-24 in. \$6.00.
- * **DR. CHAS. BAUMAN.** Deep blood red. Late. 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00.
- * **FANNY.** A beautiful rose-pink. Early. 15-18 in. \$5.00; 24-30 in. \$8.50; 30-36 in. \$10.00.
- IGNEA NOVA.** Carmine-red, yellow lobe. Late. 15-18 in. \$5.00; 18-24 in. \$6.50.
- * **NANCY WATERER.** This has a large, bright, deep golden yellow flower with lighter shades. One of the best. Mid-season. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$12.00.
- ** **NARCISSIFLORA.** AM 1954. A taller growing clear sulphur yellow. Double. Mid-season. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50.
- * **PALLAS** (E). Geranium red with orange blotch and a little earlier than the others. 15-18 in. \$5.00; 18-24 in. \$6.50; 30-36 in. \$10.00.
- SAND DE GENTBRUGGE.** Dark crimson. Late. Temporarily sold out.
- ** **UNQUE.** AM 1952. This is a very striking, strong, bright, deep buff-yellow, blushed and suffused orange. Large truss; open habit. A taller grower than the others and one of the very best. 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$12.50; 42-48 in. \$15.00.

IRENE KOSTER — Fragrant Occidentalis, Pink

BEAUTEOUS AND FRAGRANT OCCIDENTALIS HYBRIDS

Comparatively new in this country are these flower gems, which in the Spring present a mass of blooms in the softer, more refined shades and fill the air with delicate perfume. The different varieties form one of the loveliest groups of plants. Their shades range through pink, cream, white, yellow and soft orange, variegated and blended in pleasing harmony. Budded, ready for Spring bloom.

- ** **DELICATISSIMA.** Creamy white with pink and yellow and orange shades. Temporarily sold out.
- *** **EXQUISITA.** AM 1950. This is the latest of the Occidentalis to bloom. It has shades of pink and white and light yellow and cream, with pink predominating. 30-36 in. \$10.00; 36-42 in. \$12.50.
- ** **GRACIOSA.** AM 1908. Blooms of this variety have a sharper contrast of strong colors—creamy pink with orange and yellow markings. One of the best. Slower growing. 18-24 in. \$7.00; 24-30 in. \$8.00.
- * **IRENE KOSTER.** This is the earliest of the Occidentalis to bloom. It has shades of soft, light and dark pinks, and fills the air with fragrance. Most popular of the group. 12-15 in. \$5.00; 15-18 in. \$6.00; 18-21 in. \$7.00; 24-30 in. \$8.00.
- ** **MAGNIFICA.** This variety is similar in color to Graciosa. Creamy white flushed pink with yellow and orange only softer color contrasts. Temporarily sold out.

The plants you sent to me arrived in perfect condition. The Blue Ensign is now in bloom and it is very obvious why it won a challenge cup award.

HARDY EVERGREEN AZALEAS

THE EXTRA HARDY MALVATICA EVERGREENS

This is a relatively new group and is destined to have a permanent place in our gardens. They have larger flowers and larger bushes than the Kurumes. The plants will grow to about 4 feet in height and 5 feet across and are smothered with bright blooms in the Spring. They are very hardy and range in color through the various shades of pink and rose, orange and red. Fine for foreground and mass planting. Will stand full sun but the flowers last longer in part shade. Have grown in the coldest parts of Ohio, Illinois and Michigan. Budded and ready for bloom.
